Creating / Amending SMS Templates.....	9
System Customisation – closing date has passed.....	9

The communications section is where all system communication templates are created and held. To access this, go to **Settings > Communications** in the left-hand menu.

There are four available options in this section:

- Email Options
- Letter Options
- Contract Options
- SMS Options

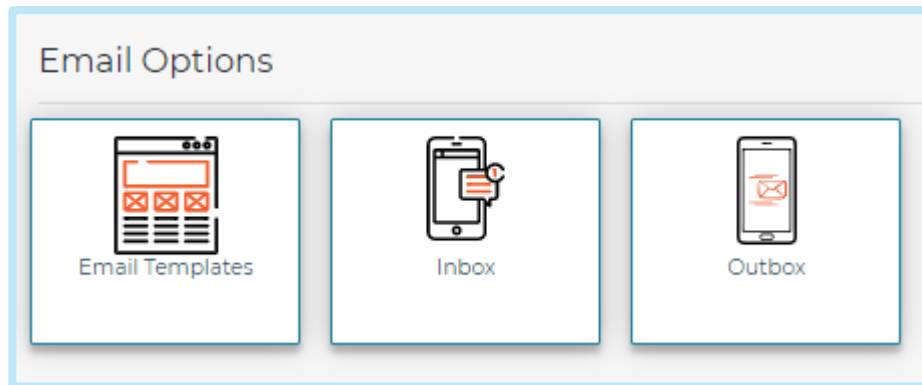

Depending on the set up of your Jobtrain platform, some of the options mentioned in this section may not be available on your platform.

Email Options

There are three available tiles in the **Email Options**:

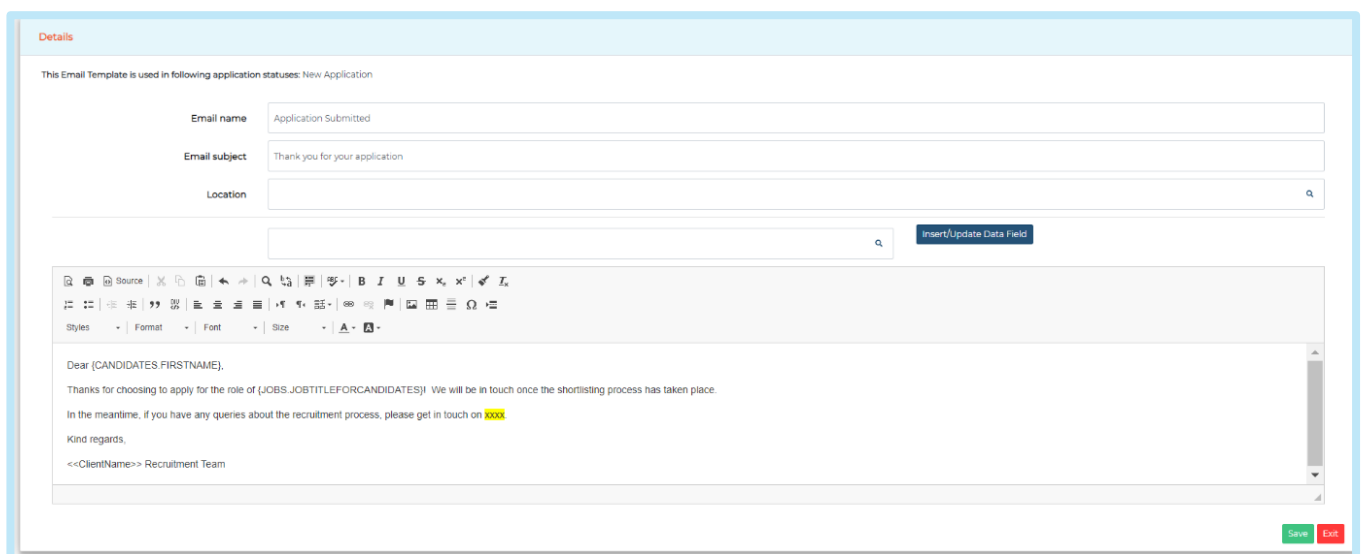

- **Email Templates:** this is where you can create or update email templates to be used within Jobtrain
- **Inbox:** this displays all emails that have been received from candidates via Jobtrain
- **Outbox:** displays a list of all emails that have been sent out from Jobtrain

Emails displayed in the Inbox have been sent from candidates who, once logged into the candidate site, have selected my profile > my emails > create new email.

Creating and amending Email Templates

- In **Email Options**, select **Email Templates**
- Choose **Create Email Template** from the left-hand menu which will open a new window:

A screenshot of a 'Details' window for creating or updating an email template. The window has a light blue header with the title 'Details'. Below the header, there is a message: 'This Email Template is used in following application statuses: New Application'. The main content area contains several input fields: 'Email name' with the value 'Application Submitted', 'Email subject' with the value 'Thank you for your application', and 'Location' which is empty. Below these fields is a search bar and a button labeled 'Insert/Update Data Field'. At the bottom, there is a rich text editor with a toolbar containing various icons for text formatting (bold, italic, underline, etc.) and a text area containing the following text: 'Dear {CANDIDATES.FIRSTNAME},', 'Thanks for choosing to apply for the role of {JOBS.JOBTITLEFORCANDIDATES}! We will be in touch once the shortlisting process has taken place.', 'In the meantime, if you have any queries about the recruitment process, please get in touch on xxx', 'Kind regards,', and '<<ClientName>> Recruitment Team'. At the bottom right of the window, there are two buttons: 'Save' (green) and 'Exit' (red).

- Add the **Email name** and **Email subject** that will be sent to the recipients. Whilst not essential, you can also add a location if required to help when users are searching for the correct email template to use

Important note for clients utilising the [Email & Calendar Integration](#):

To ensure that candidates' responses are recorded in their received emails, you **must** include the job reference number merge field in the email subject of all automatically generated candidate emails.

Merge field to be used: {JOBS.JOBREFERENCE}

For example:

- Acknowledgement Emails
- Incomplete Application Notifications
- 2nd Stage Application and Acknowledgment Email
- Invite to Interview Emails for Manual Interviews
- Invite to Interview & Interview Confirmation emails for interviews managed by the Self-Service Calendar / Event Manager
- Onboarding Emails
- Emails relating to 3rd Party Integrations such as DBS Checking, RTW checks & online testing.
- Any emails that are attached to a candidate application status.

Did you know? You can easily identify any emails that are attached to a candidate application status within the email template itself as highlighted below.

Communication: Emails

Details

This Email Template is used in following application statuses: Invite to 2nd stage, Incomplete Application - Jules Test

Email name: 2nd Stage Application Complete

Email subject: Thanks for completing the 2nd stage application

Location: [Search]

[Search] [Insert/Update Data Field]

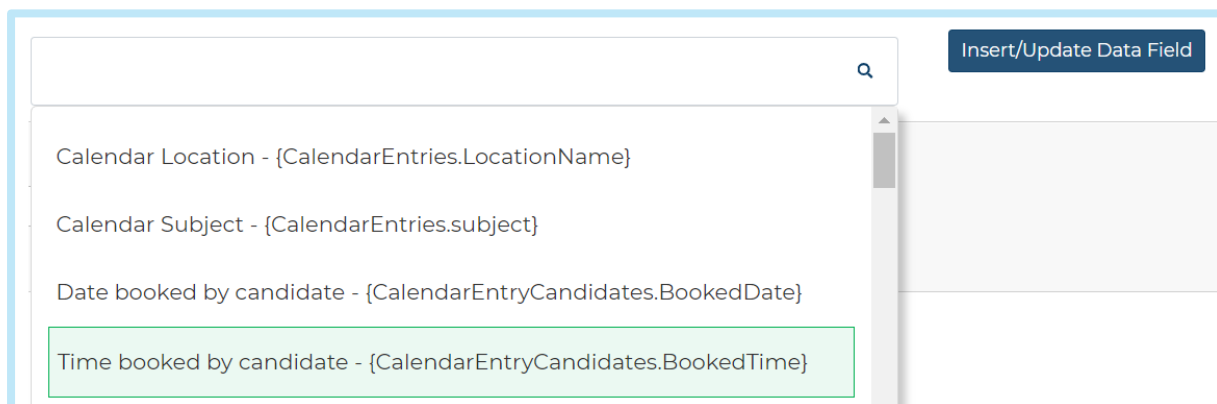

[Rich Text Editor Toolbar]

- Add the main body of the email content using the formatting tools available to make any format changes

As with any wording content entered into Jobtrain, we recommend copying the content into Notepad first before copying into the platform to ensure any hidden formatting is removed.

- To add merge fields, place your cursor in the area you wish to add the merge field. Start typing the name of the merge field or select from the dropdown menu and click Insert/Update data field

Merge fields can only be added one at a time.

Date Merge fields

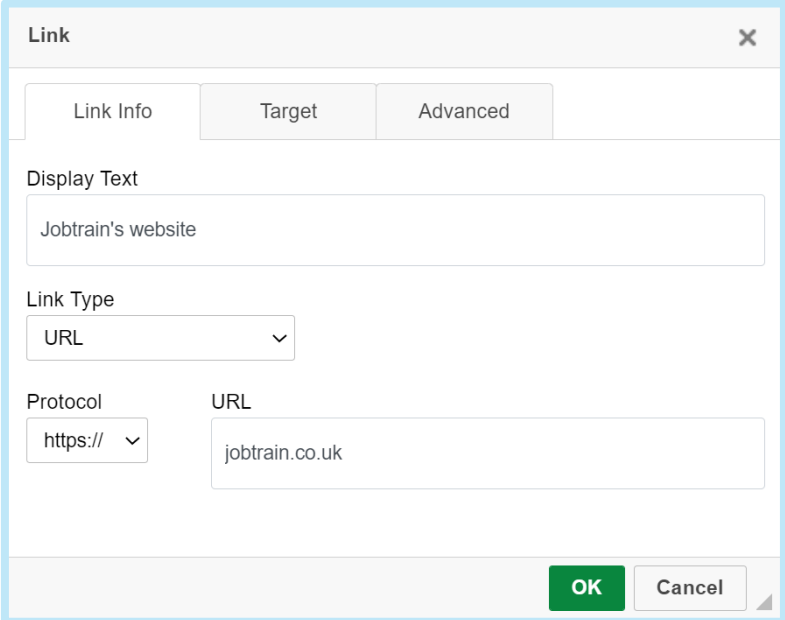

You can customise the appearance of the date merge fields when sending manual emails through the communication option in the candidate list action menu. This feature enables you to choose a long format such as "Tuesday 26th March, 2024" if required.

To specify the date format go to Settings > System Customisation > Set the date format and select the preferred date format for communications.

Once all formatting is complete and you have added all required merge fields to the email template, click **Save** and **Exit**.

How to add a link/URL to a website:

1. Select the paperclip icon 
2. A pop-up box will open
3. **Add Display Text:** this is the wording that will be displayed in the email
4. **Link Type:** select URL
5. **Protocol:** choose what precedes the URL - https:// or http:// or one of the other options available
6. **URL:** add the URL/link
7. Press **OK**

The 'Link' dialog box has three tabs: 'Link Info', 'Target', and 'Advanced'. The 'Link Info' tab is active. It contains the following fields:

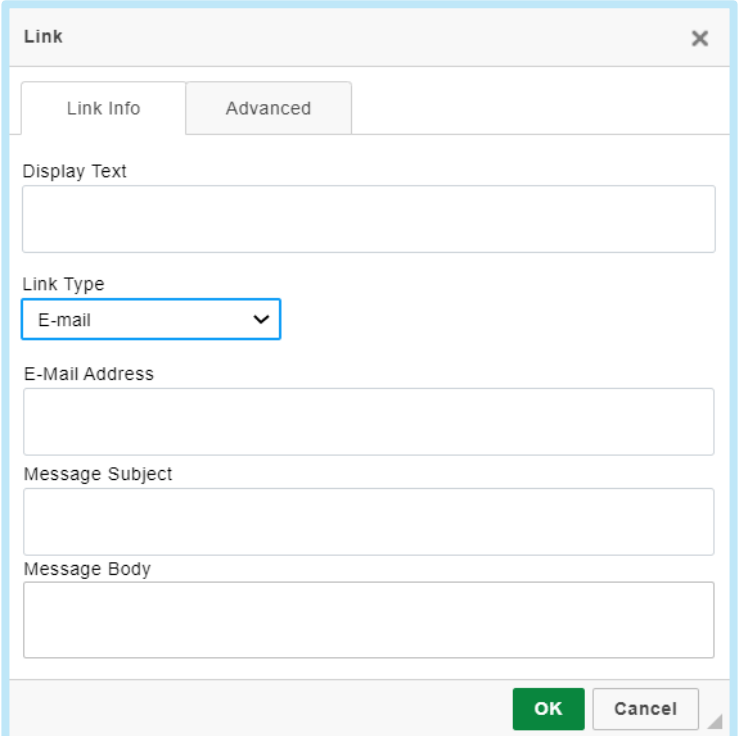

- Display Text:** A text input field containing 'Jobtrain's website'.
- Link Type:** A dropdown menu with 'URL' selected.
- Protocol:** A dropdown menu with 'https://' selected.
- URL:** A text input field containing 'jobtrain.co.uk'.

At the bottom right, there are 'OK' and 'Cancel' buttons.

Add a link to an email address:

1. Select the paperclip icon 
2. **Link Type:** select E-mail
3. **E-Mail Address:** add the email address here
4. **Message Subject:** add the message subject
5. Press **OK**

You can also set the email subject so that when the recipient of the email clicks on the email link the email subject is already filled out for them.

The 'Link' dialog box has two tabs: 'Link Info' and 'Advanced'. The 'Link Info' tab is active. It contains the following fields:

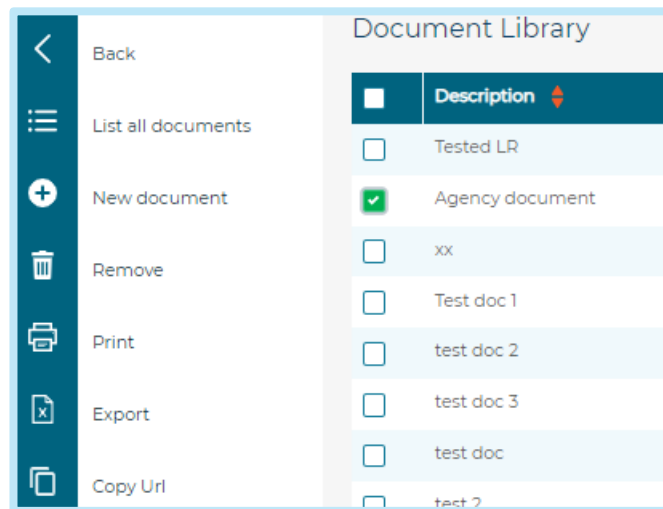

- Display Text:** An empty text input field.
- Link Type:** A dropdown menu with 'E-mail' selected.
- E-Mail Address:** An empty text input field.
- Message Subject:** An empty text input field.
- Message Body:** An empty text input field.

At the bottom right, there are 'OK' and 'Cancel' buttons.

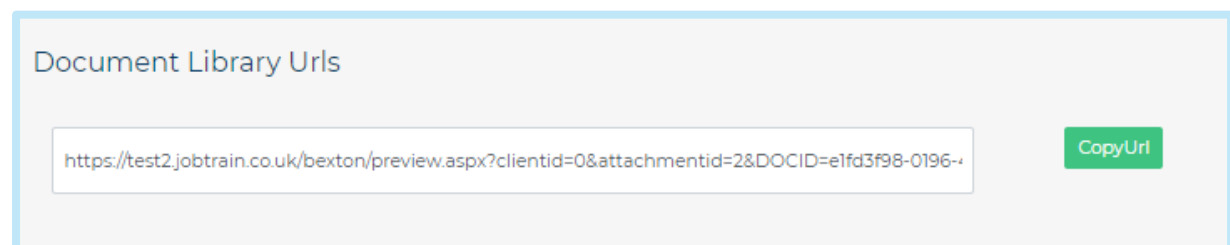

Once all formatting is complete and you have added all required merge fields to the email template, click **Save** and **Exit**.

Attach a document from the document library to an email template:

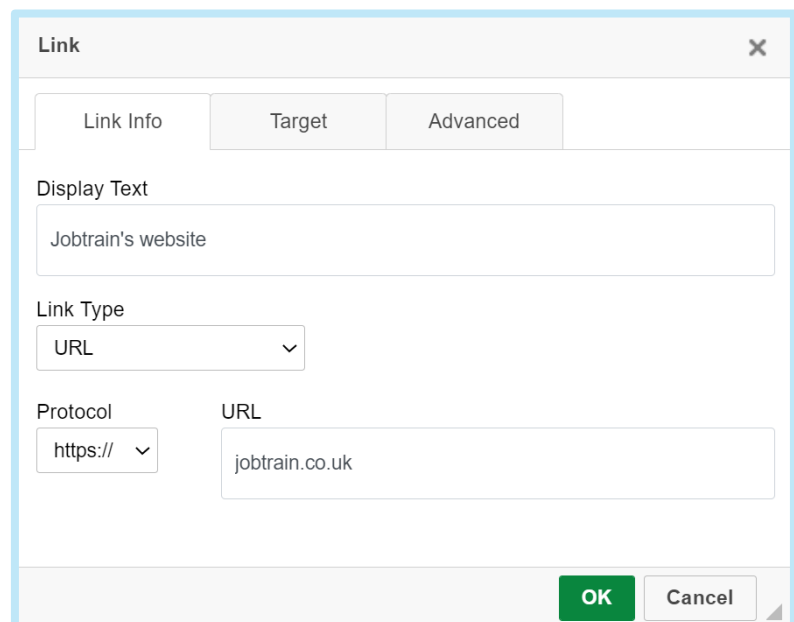

1. First, copy the URL of the document you wish to attach to the email
2. Go to Settings > General Settings > Document Library
3. Select the document you would like to attach and then **Copy Url**

4. The page will then refresh to show the Url

5. **Copy Url**
6. Go back Settings > Communications > Email Templates
7. Open up the relevant email template
8. Select the paperclip icon
9. A pop-up box will open
10. **Add Display Text:** this is the wording that will be displayed in the email, so add in the name of the document
11. **Link Type:** select URL
12. **Protocol:** choose what precedes the URL - https:// or http:// or one of the other options available
13. **URL:** add the URL/link
14. Press **OK**

When candidates then click on this link it will download a copy of the attached document.

Amending Email Templates

To amend any existing email templates, simply find the template in the list of templates (or use the **Search emails** function at the top of the email templates page). Select the email name to open the editing window.

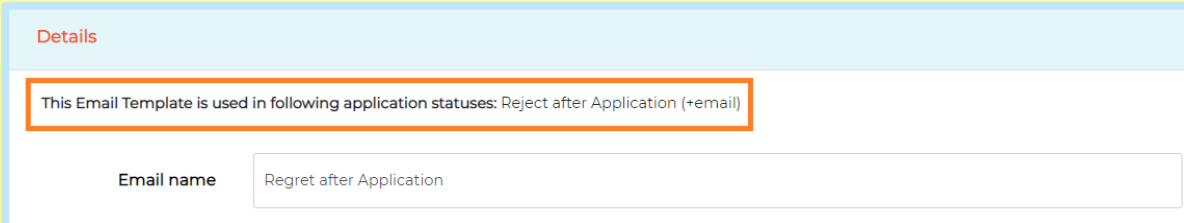

Make any required changes, then click **Save** and **Exit**.

Unused email templates can also be archived. Simply check the box next to the template and select **Archive** in the left-hand menu.

Email Templates connected to candidate statuses

We would always recommend checking that the email template you wish to archive is not attached to any candidate statuses.

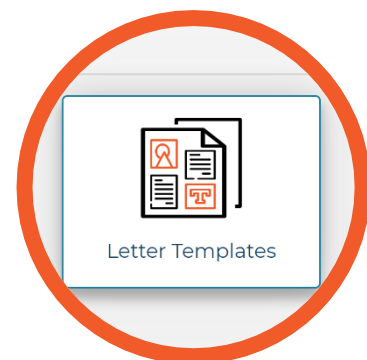

You will be able to see at the top of the page whether the email is linked to any candidate statuses:

Details	
This Email Template is used in following application statuses: Reject after Application (+email)	
Email name	Regret after Application

Creating/Amending Letter Templates

Select the letter options section and click on the letter templates tile.

- Select **Create Letter Template** from the left-hand menu - a pop-up window will open
- Or click on a Letter Name to open and edit an existing template
- Add a **Letter name** and main body of the letter wording, using the formatting tools available to make any format changes

As with any wording content entered into Jobtrain, we recommend copying the content into Notepad first before copying into the platform to ensure any hidden formatting is removed.

- To add merge fields, place your cursor where you wish to add the merge field, select from the dropdown menu and click Insert/Update data field

Please Select

Insert/Update Data Field

Merge fields can only be added one at a time.

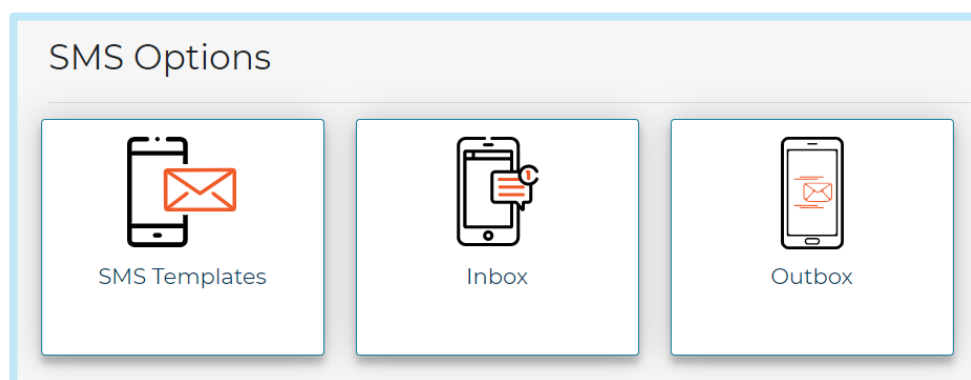

Once all formatting is complete and you have added all required merge fields to the letter template, click **Save** and **Exit**.

SMS Options

Text messaging is an optional feature. If you do not currently have access to this functionality, your Client Success Manager will be happy to discuss this feature with you.

Similar to the email options, there are three areas in **SMS Options**:

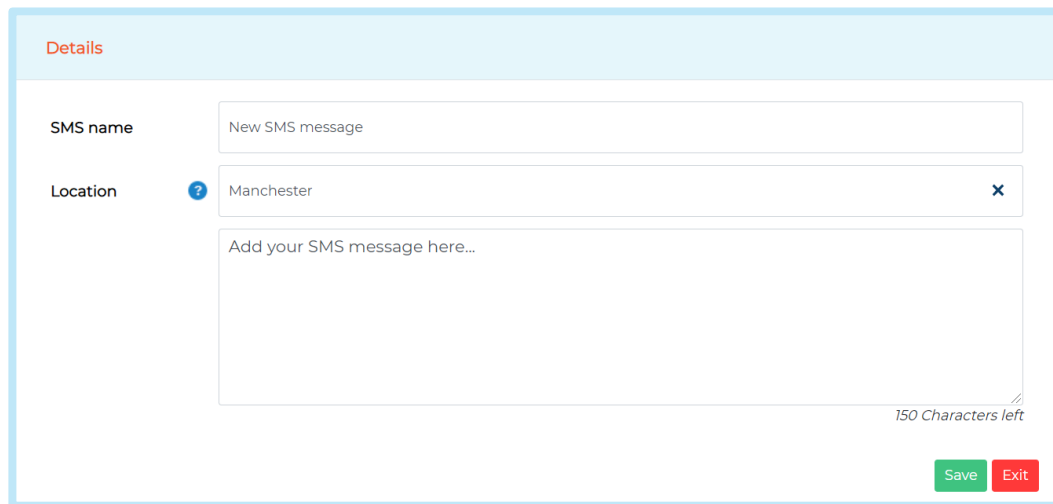

- **SMS Templates:** create or update SMS templates used within Jobtrain
- **Inbox:** displays all text messages received from candidates via Jobtrain
- **Outbox:** displays a list of all text messages sent out from Jobtrain

Depending on the set up of your Jobtrain platform, you may have either one-way or two-way SMS messaging. If you have the one-way option candidates will not be able to reply to SMS messages therefore the inbox would be empty.

Creating / Amending SMS Templates

- Under **SMS Options**, select **SMS Templates**
- Select **Create SMS** from the left-hand menu - a pop-up window will be displayed
- Or select SMS Subject to open and edit an existing text message template
- Add the SMS name and, if required, add a location to help users search for the correct template to use
- Add the text message content in the main text box

The screenshot shows a 'Details' form for creating or editing an SMS template. It includes a text input for 'SMS name' with the placeholder 'New SMS message', a dropdown menu for 'Location' with 'Manchester' selected, and a large text area for the message content with the placeholder 'Add your SMS message here...'. A character counter at the bottom right indicates '150 Characters left'. At the bottom right of the form are 'Save' and 'Exit' buttons.

A 150 character limit is in place on SMS templates. The character counter at the bottom right corner of the text box will count how many characters you have remaining.

Once the content is complete in the SMS template, press **Save** then **Exit**.

System Customisation – closing date has passed

You can set-up an email template to send to Line Managers once a closing date has passed or a job has been made live.

Update this by following the steps below:

Settings > System Customisation > Emails > Set default emails to line manager > Closing date passed email to line managers and Live notification to line manager.

Within the closing date is passed or the job is now live email templates, you can use the following merge fields:

<<JobTitle>>
<<JobID>>
<<Location>>
